

SCIENCES BIOMOLÉCULAIRES (BML)

Les cours en sciences biomoléculaires (BML) est offert par la Faculté des sciences

BML 8101 Core Biomolecular Sciences I (1.5 units)

Topics may include molecular and synthetic biology, proteins, bioinformatics and integrated elements of chemical biology, and other branches of chemistry relevant for the biomolecular sciences.

Course Component: Lecture

BML 8102 Core Biomolecular Sciences II (1.5 units)

Topics may include lipids, sugars, nucleic acids, genomics, disease models, biotechnology applications and integrated elements of chemical biology, and other branches of chemistry relevant for the biomolecular sciences.

Course Component: Lecture

Prerequisite: BML 8101.
